WITH THE Western Weeklies

A Lasting Wood.

When Colonel Coleman made survey for the Southern Railway up the mountain in 1858 a poplar trough, with a lid, was constructed to hold milk for use of the men camping at Round Knob. In the intervening years this receptacle had gradually disap-peared from view; but the late flood and washout exposed its resting place four feet below the surface of the soil. We are informed the box or trough was found in perfect condition, with its lid lying near by. Who said poplar wasn't lasting wood?—Old Fort Sen-tinel.

Tryon Man Dead.

After a fight of ten or twelve years with ill health, Mr. A. J. Lemort finally succumbed on Sunday morning to carcinoma and was buried Tuesday in the Tryon cemetery. Mr. Lemort was a native of Bordeaux, France, being born there in 1861, but has lived in America for years. He came to Tryon about 1893 and started in the grape and wine business and has been very successful, his wines are favorably known all over the country. He has always been a very active man taking a prominent stand on all questions of the day, good roads and schools. He was an active member of the Tryon Fruit Exchange. Friends from Ashe-ville, Spartanburg and other places at-tended the funeral. Father Marion of Asheville conducted the services. Mr. Lemort is survived by a wife and five children, two of them being sons by first marriage.—Tryon News-Bee.

A Lot More to Do.

Now, that philanthropists and statesmen have settled the question of child labor in factories, mines, etc., perhaps they will undertake to regu-late infantile endeavor in selling newspapers in Northern cities before 5 o'clock in the morning; then they may undertake the liberation of chil-dren from more than twelve hours work per day on the farm. There's quite a lot of things those welfare wranglers have to do before they make idlers of all the kids.—Old Fort Sen-tinel.

"Boil It Down."

"Boil it down" used to be stand-ing orders in newspaper offices—meaning to cut out useless matter in every-thing intended for publication. But in recent years "puff it up" has been the practice in many shops. Thus many a ten-line item been made to fill a col-umn of space. The scarcity of print-paper and its extremely high price may not prove an unmixed evil if writers are forced to put into practice the art of condensation—to "boil down" to essential essence the flowing stream of verbosity. Readers will benefit by the enforced abbreviation, in that they may then have time to ponder and digest what has been terse-ly told.—Old Fort Sentinel.

Good Money in Ties.

Ties are now being hauled into the Franklin tie yard. One man with a two-horse wagon hauled in one day ties that netted him \$15. He made this clear, as this was left after he had paid his tie cutters.—Franklin Press.

Street Work at Marshall.

The surfacing of the streets here is contracted to begin on the 15th of September. A member of the board of aldermen informed us that the work will begin 15 days later than specified by the terms of the contract. This on account of the general delay in the completion of other work caused by the flood.—News-Record.

To Organize Apple Exchange.

The apple growers of this county are to meet Saturday afternoon at 2 o'clock at the courthouse for the purpose of or-ganizing an exchange. Wm. R. Camp, head of the State Division of Markets is spending this week in this section to acquaint the workers with plans for organization and its advantages and will address the meeting.

The State Division of Markets has organized growers to find better mar-kets and to obtain better prices in dif-ferent parts of the State. In the case of strawberries it has meant a dollar more per crate to the producer, a bet-ter grade and increased production. Similar results have been obtained in the cooperative marketing of Irish and sweet potatoes.—Carolina Mountaineer.

Waynesville's Water Supply.

We wish to call to the attention of visitors our ample and pure water supply. The city has this year bought and paid for nearly 1000 acres of wa-ter shed and has just built about six miles of six strand barbed wire fence around it. We have something to boast about.—Carolina Mountaineer.

A Difference.

It is a remarkable fact that some counties possessing from two to three hundred miles of improved highways are still talking of increasing the mile-age.

While other counties, with just as prosperous people living in it and pos-sessing just as fertile land and natu-ral resources, have practically not a mile of improved highways outside of those in towns and don't care a cent about them.

This difference in rural uplift is hard to define.

Perhaps the reason why the coun-ties with a taste of good roads want more of them so strenuously is be-cause they have experienced their val-ue, while those who plod along with old-time clay roads haven't an oppor-tunity of noting how much time and energy they wasted in putting up with them.

It is a fact, however, that the good roads movement is spreading annu-ally, and in ten years there won't be a county in the country without a fair supply of real roads.—Franklin Press.

Sheriff Hill Withdraws.

Sheriff A. L. Hill has withdrawn from the Democratic ticket for the office of Sheriff.—Tryon News-Bee.

George Jackson Caught.

George Jackson, who escaped from the county jail just before the last term of court, was captured Sunday night at Bryson. At the time George got away, three men were with him, Jim Griffin, Jesse Fuller and Jess Spivey. Griffin is the only one who has been successful in eluding the officers. Spivey and Fuller were captured be-fore court and Spivey was sent to the roads. Fuller was let off on the cost and sentence, pending good behavior, but since then has again broken the law and is back in jail.—Bryson City Times.

Acting Mayor Andrews.

At a meeting of the board of alder-men Tuesday, Alderman J. E. Tidwell was elected mayor pro-tem to act in the absence of Mayor Russell who is in an Atlanta hospital undergoing treatment. No other business of im-portance was taken up by the board.—Andrews Sun.

DRAINAGE RELIEF FOR THE FLOODED DISTRICTS.

Prevailing conditions in western North Carolina are such as to justify temporary measures in protecting the crops and soils that are left.

Most of the rich top soil has to some extent washed away, leaving a soil that is low in humus and of a fine-grain mixture. Such soils yield easily to erosion, which should be checked until grasses and cover crops get control again. As a temporary relief a system of small falling ter-races with half spacing should be im-mediate established. This can be done during the plowing by throwing up small banks 5 or 6 feet wide, with 6 inches fall in 100 feet and a vertical spacing of 2 to 3 feet apart. These may be abandoned very easily when normal conditions return, or every other terrace may be enlarged and maintained.

To fill the gullies recently made small earth dams or other obstruc-tions should be built across them, al-lowing the collected water to pass away through pipes laid under the dams. If nothing is done, these gul-lies increase in size with each rain.

To get relief from the valley lands, the streams should be cleared of all debris. If this is not done, the chan-nel will become silted up and over-flow conditions will become perman-ent, even for ordinary rains, thus destroying the agricultural value of such lands.—Extension News.

GETTING READY FOR SCHOOL.

School Children Should Have all De-fects and Minor Ailments Cor-rected Before School Starts

"There's something in the Septem-ber air," says the State Board of Health, "that puts one in mind of school and books, of getting together bookbags and lunch baskets and starting out on another six, eight or ten months' school. But books and the lunch basket are not all of the preparations needed today toward get-ting ready for school. The school is no longer considered a mere brain factory working independently of other conditions and relations, but is rather a plant that works both the mind and body. Children bring with them to school both brains and bodies, and one is not normally developed in-dependent of the other.

"The real and most important pre-paration for school," says the Board, "is on the part of parents in behalf of their children's health. Every parent wants his child to have the best possible training of its intellect, but rarely does he appreciate the fact that the development of his child's mind is often handicapped by some disease, defect or minor ailment. Sometimes it is a child's teeth, weak eyes or slightly deaf ears, or probably an unhealed sore that saps the foun-dation of its health and education. In other words, it is often the 'little foxes' that spoil the vines! These 'little foxes' or trivial ailments are not to be overlooked in getting a child ready for school."

300,000,000 RED CROSS SEALS BEING PRINTED.

Three hundred million Red Cross Christmas Seals are being printed in Cincinnati for the annual holiday cam-paign to be conducted under the joint auspices of the American Red Cross and The National Association for the Study and Prevention of Tu-berculosis.

The campaign for the sale of Red Cross Seals this year will be larger than ever before. Although in 1915 the sale reached the record total of 80,000,000 seals, bringing in \$300,000, it is expected that this year at least 100,000,000 seals or \$1,000,000 worth will be sold. The sale will be orga-nized from Alaska to the Canal Zone and from Hawaii to Porto Rico. Every state and territory in the United States will have seals on sale. New organiza-tions will be working in a number of the western states, including Montana, Utah and Wyoming. Distribution of the seals is now under way.

The Red Cross Christmas Seal for 1916 was designed by Mr. T. M. Cleland of New York City. It shows a Santa Claus in red on a green back-ground, in the center panel with a pack on his back bearing a red cross. The lettering "A Merry Christmas" and "A Happy New Year" is carried vertically up and down the sides of the seal, while the date and the words "American Red Cross" are across the bottom of the seal. The poster effect given by this seal is very striking and makes an unusually handsome design.

CALOMEL IS MERCURY! IT SICKENS! ACTS ON LIVER LIKE DYNAMITE

"Dodson's Liver Tone" Starts Your Liver Better Than Calomel and Doesn't Salivate or Make You Sick.

Listen to me! Take no more sick-ening, salivating calomel when bilious or constipated. Don't lose a day's work! Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with your liver crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are slug-gish and "all knocked out," if your liver is to id and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour just take a spoonful of harmless Dod-son's Liver Tone on my guarantee.

Here's my guarantee—Go to any drug store and get a 50 cent bottle of Dod-son's Liver Tone. Take a spoonful to-night and if it doesn't straighten you right up and make you feel fine and vigorous by morning I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it can not salivate or make you sick. I guarantee that one spoonful of Dod-son's Liver Tone will put your sluggish liver to work and clean your bowels of that sour bile and constipated waste which is clogging your system and mak-ing you feel miserable. I guarantee that a bottle of Dodson's Liver Tone will keep your entire family feeling fine for months. Give it to your children. It is harmless; doesn't gripe and they like its pleasant taste.

Fruitland Institute

FALL TERM OPENS AUGUST 22, 1916

Prepares for teaching, for college, for life. Literary courses from the sixth to the eleventh grade.

Music—Voice, organ and piano Art: Drawing, water color and oil painting Home Economics—Theory and practical application taught in the Girls' Home.

MISS KATE C. SHIPP

NINE RULES FOR GETTING WINTER EGGS.

1. Keep more pure-bred hens of a good laying strain.
2. Keep one breed, the best you can get.
3. Select your breeding eggs from the best layers.
4. Select the large, uniform eggs or even shapes and color.
5. Hatch your pullets in February, March and April.
6. Provide good feed and housing.
7. Feed a variety of grains, corn oats, wheat, sunflower seed.
8. Feed a bran mash of corn meal, wheat bran, cottonseed meal, or beef scrap.
9. Keep a good scratch of straw to feed all grain in to induce exercise.—E. P. Clayton.

BIG CROWDS.

It is good news that blows down from the mountains to the effect that larger crowds, larger than heretofore are gathering in Asheville and near by places. It shows that despite the floods and despite all untoward cir-cumstances gradually the Land of the Sky is becoming known to tourists and it is there that tourists' most do con-gregate. The day will come, if pro-per advertising is done, when West-ern North Carolina will be the most popular summer resort in America. The scenery is there; the climate is there—all that is necessary is to "nor-malize" it as the African would explain.—Greensboro Everything.

Coming twenty-seven miles through water pipes a beautiful rainbow trout, ten and a half inches long, popped out of the pipe which fills the swim-ming pool at Aston Park in Asheville and proceeded to show what a swim-ming pool was built for. The water was less than a foot deep in the pool at the time the trout came through, and Manager Wilson, who is in charge of the pool, had mountain trout for supper.

TAR HEEL NEWS

Four thousand have taken the anti-typhoid treatment in Burke county.

Johnston county's first bale of cot-ton brought 16 cents.

The Merchants' Association of Tay-lorsville has been re-organized.

During August Collector Watts of the fifth district collected \$1,649,890.75 internal revenue taxes.

The East Monbo Cotton Mill, badly damaged by the flood, has resumed op-erations.

Plans were laid in Gastonia for forming a Greater Gaston County As-sociation.

The first bale of cotton grown in Union county was sold at Monroe for 15 cents per pound.

L. H. Robinson of Mecklenburg this year duplicated his feat of 14 previous years and sold the first bale of cotton in that county last week at 15 cents.

A few days ago a 15-year-old boy confined in the Burke county jail made his escape by digging a gaping hole through the walls of the new jail.

W. Burnett Smith, Jr., of Charlotte, was one among the lost when the United States cruiser went aground at San Domingo recently.

The matter of a site for the new union station at Warsaw has caused a controversy among the citizens of that place.

There were seventy nine of the one hundred and two applicants in the re-cent law examination before the su-preme court who were successful.

H. C. Heason, promoter of a prize fight at Durham, and Douglass Ryder and Roy Ross, the prize fighters, were fined by Judge Daniels in criminal court at Durham last week.
